# HYDROLOGIC DATA AREAL COVERAGE OF VOLUMES

EACH VOLUME CONTAINS

- Appendix A: Climatological Data
- Appendix B: Surface Water Measurements
- Appendix C: Ground Water Measurements
- Appendix D: Surface Water Quality Data
- Appendix E: Ground Water Quality Data

THIS VOLUME : 

## FOREWORD

The hydrologic data programs of the Department of Water Resources supplement the data collection activities of other agencies and help satisfy the needs for data on the quality and quantity of water in the State. Bulletin No. 130-73 presents accurate, comprehensive, and timely hydrologic data which provide a more complete knowledge of the factors affecting our environment and are prerequisites for effective planning, design, construction, and operation of water facilities.

The Bulletin No. 130 series is published annually in five volumes. Each volume presents hydrologic data for one of five reporting areas of the State. These areas are delineated on the map on the opposite page.

## ABSTRACT

Report contains tables showing data on climate, surface water flow, change of ground water levels, and surface and ground water quality in the Central Coastal Area for the 1972-73 water year. Figures show the location of climatological observation stations and ground water basins; the fluctuation of average ground water level; fluctuation of water level in wells; the location of surface water measurement and surface water quality stations; and hydrographic unit boundaries.

## INTRODUCTION

This bulletin contains data regarding climate, surface water, ground water levels, and surface and ground water quality. The data were collected by the Department of Water Resources and by various organizations cooperating with the Department.

The Department's files contain some data that currently are not being published. Inquiries regarding local data should be directed to the District Offices listed as follows:

Central District  
P. O. Box 9137  
3251 S Street  
Sacramento, CA 95816

San Joaquin District  
P. O. Box 2385  
3374 East Shields Avenue  
Fresno, CA 93723

Northern District  
P. O. Box 607  
2440 Main Street  
Red Bluff, CA 96080

Southern District  
P. O. Box 6598  
849 South Broadway  
Los Angeles, CA 90055

Inquiries regarding statewide data should be directed to the Division Office:

Division of Resources Development  
P. O. Box 388  
1416 Ninth Street  
Sacramento, CA 95802

Federal and local agencies also are maintaining substantial data files. A partial listing follows:

### Federal Agencies

U. S. Army, Corps of Engineers

## Appendix A

### CLIMATOLOGICAL DATA

This appendix contains monthly precipitation data for certain climate stations for the 1973 water year, October 1, 1972, through September 30, 1973. Additional precipitation data, as well as data concerning air temperature, wind, and evaporation, are available in the National Weather Service's publications "Climatological Data - California"; and, for particular key stations, "Local Climate Data". These publications can be obtained from:

Superintendent of Documents  
Government Printing Office  
Washington, D. C. 20402

Other agencies within the area covered by this report have established their own supplemental rain gage networks. Some of these agencies are: Alameda County Flood Control and Water Conservation District; City of San Francisco; Contra Costa County Flood Control and Water District; East Bay Municipal Utility District; Marin Municipal Water District; Marin County Department of Public Works; Monterey County; San Benito County; San Luis Obispo County Flood Control and Water District; Santa Clara Valley Water District; Santa Cruz County Department of Public Works; Sonoma County Water Agency; U. S. Department of the Army, Corps of Engineers, San Francisco District.

Each station in this appendix has been assigned an identification number. The letter and first digit denote the hydrographic unit as shown below. The remaining digits denote the sequence of the station in alphabetical order.

#### Central Coastal Area

D0 Santa Cruz Coast  
D1 Pajaro-San Benito Rivers  
D2 Lower Salinas River  
D3 Upper Salinas River  
D4 Monterey Coast  
T9 Upper Salinas River

#### San Francisco Bay Area

E0 San Francisco Bay  
E1 Coast-Marin  
E2 Marin-Sonoma  
E3 Napa-Solano  
E4 East Bay  
E5 Alameda Creek  
E6 Santa Clara Valley  
E7 Bayside-San Mateo  
E8 Coast-San Mateo

#### North Coastal Area

F8 Mendocino Coast  
F9 Russian River

TABLE A-1

PRECIPITATION IN CENTRAL COASTAL AREA  
DURING WATER YEAR 1973

This table summarizes monthly precipitations totals for selected stations for the 1973 water year, October 1, 1972, through September 30, 1973. The table shows each station's assigned number in accordance with the explanation given in the introduction to this appendix. Location is shown by latitude and longitude in degrees to the third decimal.

Precipitation values are shown to the nearest hundredth (.01) of an inch. Where Fischer & Porter rain gages are used, a zero is shown in the second decimal place, even though these instruments record to only the nearest tenth (.1) of an inch. The following notations are used to qualify the values:

.00- No record or incomplete record

B Record began

E Wholly or partially estimated

N Record ends

.00T Trace, an amount too small to measure

The county code shown for each station is in accordance with the Standard California County Codes shown below.

## Appendix B

### SURFACE WATER MEASUREMENTS

This appendix contains surface water data for the period from October 1, 1972, through September 30, 1973. These data consist of the amounts of water imported to the report area; daily gage heights; daily tides; and corrections and revisions to previously published reports of surface water data. Station locations are shown on Figure D-1, sheet 2.

In addition to data collected and published by the Department of Water Resources in this appendix, the U. S. Geological Survey collects and publishes data on many additional gaging stations for the same report area. This work is done under a federal-state cooperative contract or through local cooperative arrangements with other local or governmental agencies. The data published in the following reports, together with this report, present a comprehensive analysis of water resources for the area:

1. "Water Resources Data for Colifornia, Part 1: Surface Water Records, Volume I: Colorado River Basin, Southern Great Basin, and Pacific Slope Basins excluding Central Valley". U. S. Geological Survey.
2. Bulletin No. 120, "Water Conditions in California, Fall Issue". Department of Water Resources.
3. Bulletin No. 157, "Index to Stream Gaging Stations in and Adjacent to California, 1970". Department of Water Resources. This index contains the period of record -- with the number of years missing -- and more information for stations in the report area. The index also identifies the agency from which a particular record may be obtained.

## CORRECTIONS AND REVISIONS TO PREVIOUSLY PUBLISHED REPORTS OF SURFACE WATER DATA

Location of Error or Revision				Change or Revision		
Report	Page	Mile & Bank	Name	Item	From	To
Bulletin No. 23-62	394		Suisun Bay at Benicia Arsenal	<u>1962</u> Daily Maximum and Minimum Tides for the period 3-1-62 to 3-28-62, inclusive	Published values	2.00 feet lower than published values
				Maximum for March 1962	16.72	14.72
Bulletin No. 130-63	B-7		Suisun Bay at Benicia Arsenal	<u>1963</u> Maximum Gage Height of Record	6.72	5.7
				Date of Maximum Gage Height of Record	3-5-62	4-6-58
Bulletin No. 130-64	48		Suisun Bay at Benicia Arsenal	<u>1964</u> Maximum Gage Height of Record	6.72	5.7
				Date of Maximum Gage Height of Record	3-5-62	4-6-58
Bulletin No. 130-64	52		City of Vallejo from Cache Slough	Total acre-feet	Published values	Values published in Bulletin No. 130-66 Table B-2
				Average cubic feet per second	Published values	Values published in Bulletin No. 130-66 Table B-2
				Monthly quantities in percent of seasonal	Published values	Values published in Bulletin No. 130-66 Table B-2
Bulletin No. 130-67	44		Sacramento River at Collinsville	<u>1967</u> Daily Maximum and Minimum Tides		<u>Notation:</u> In order to machine process the data it was necessary to avoid negative gage heights. Subtract 10.00 feet to obtain gage heights.
Bulletin No. 130-67	45		Suisun Bay at Benicia Arsenal	Daily Maximum and Minimum Tides		<u>Notation:</u> In order to machine process the data it was necessary to avoid negative gage heights. Subtract 10.00 feet to obtain gage heights.

Appendix C

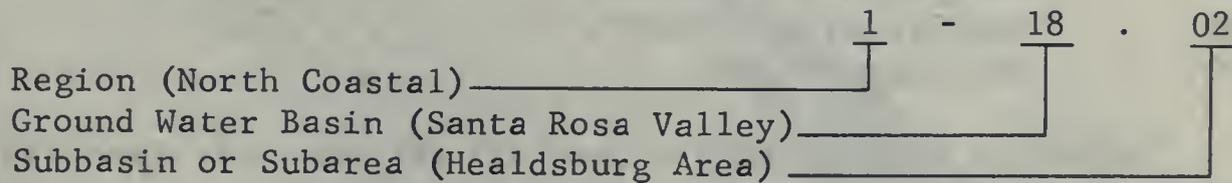

GROUND WATER MEASUREMENTS

This appendix contains summary and selected information concerning the level of ground water within 32 ground water basins or areas in the Central Coastal Area. Wells are selected to reflect the ground water conditions of the area. These wells are continuously reviewed and, when conditions dictate, replacement wells are located and measured.

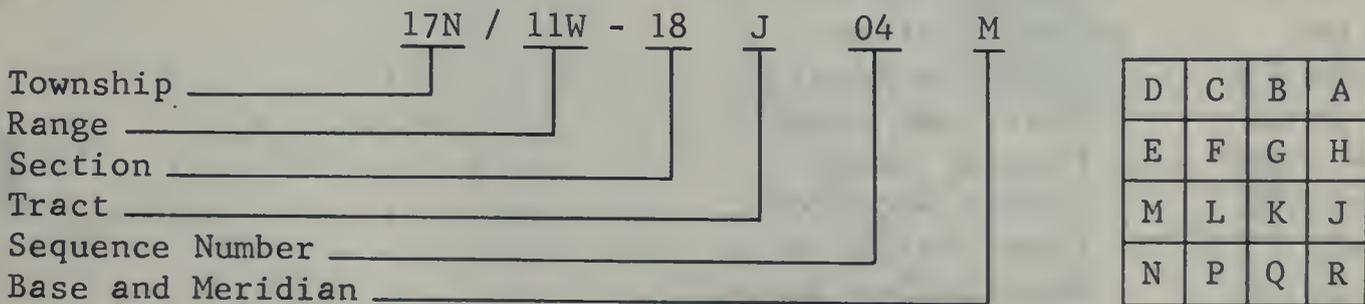

Earlier editions of this report contained a tabulation of individual measurements of ground water levels at wells. This type of data collected by the Department will be available at the various district offices of the Department. Please see the introduction at the front of this volume for the addresses of these district offices.

Table C-1 shows the average change in ground water levels for the various basins in the Central Coastal Area from spring 1972 to spring 1973. This table also shows the number of well measurements collected in the various areas. Figure C-2 contains graphical presentations of the average levels of ground water in the spring for the past several years. Figure C-3 is a graphical representation of the fluctuation of ground water level in certain selected wells for the past several years. An attempt has been made to select wells that represent conditions in the basin where the well is located. However, some caution in the use of these data is in order because ground water conditions can vary markedly with relatively small changes in horizontal location.

Two numbering systems are used by the Department to facilitate processing of water level measurement data. The two systems are the Region and Basin Designation and the State Well Numbering System. The regions used in Bulletin No. 130 are geographic areas defined in Section 13200 of the Water Code. This volume comprises the southern portion of North Coastal Region No. 1, the northern portion of Central Coastal Region No. 3, and all of San Francisco Bay Region No. 2. A decimal system of the form 0-00.00 has been selected according to geographic regions, ground water basins, and subbasins or subareas as follows:

The State Well Numbering System is based on township, range, and section subdivisions of the public land survey. The number of a well, assigned in accordance with this system, is referred to as the State Well Number, as illustrated below on the left.

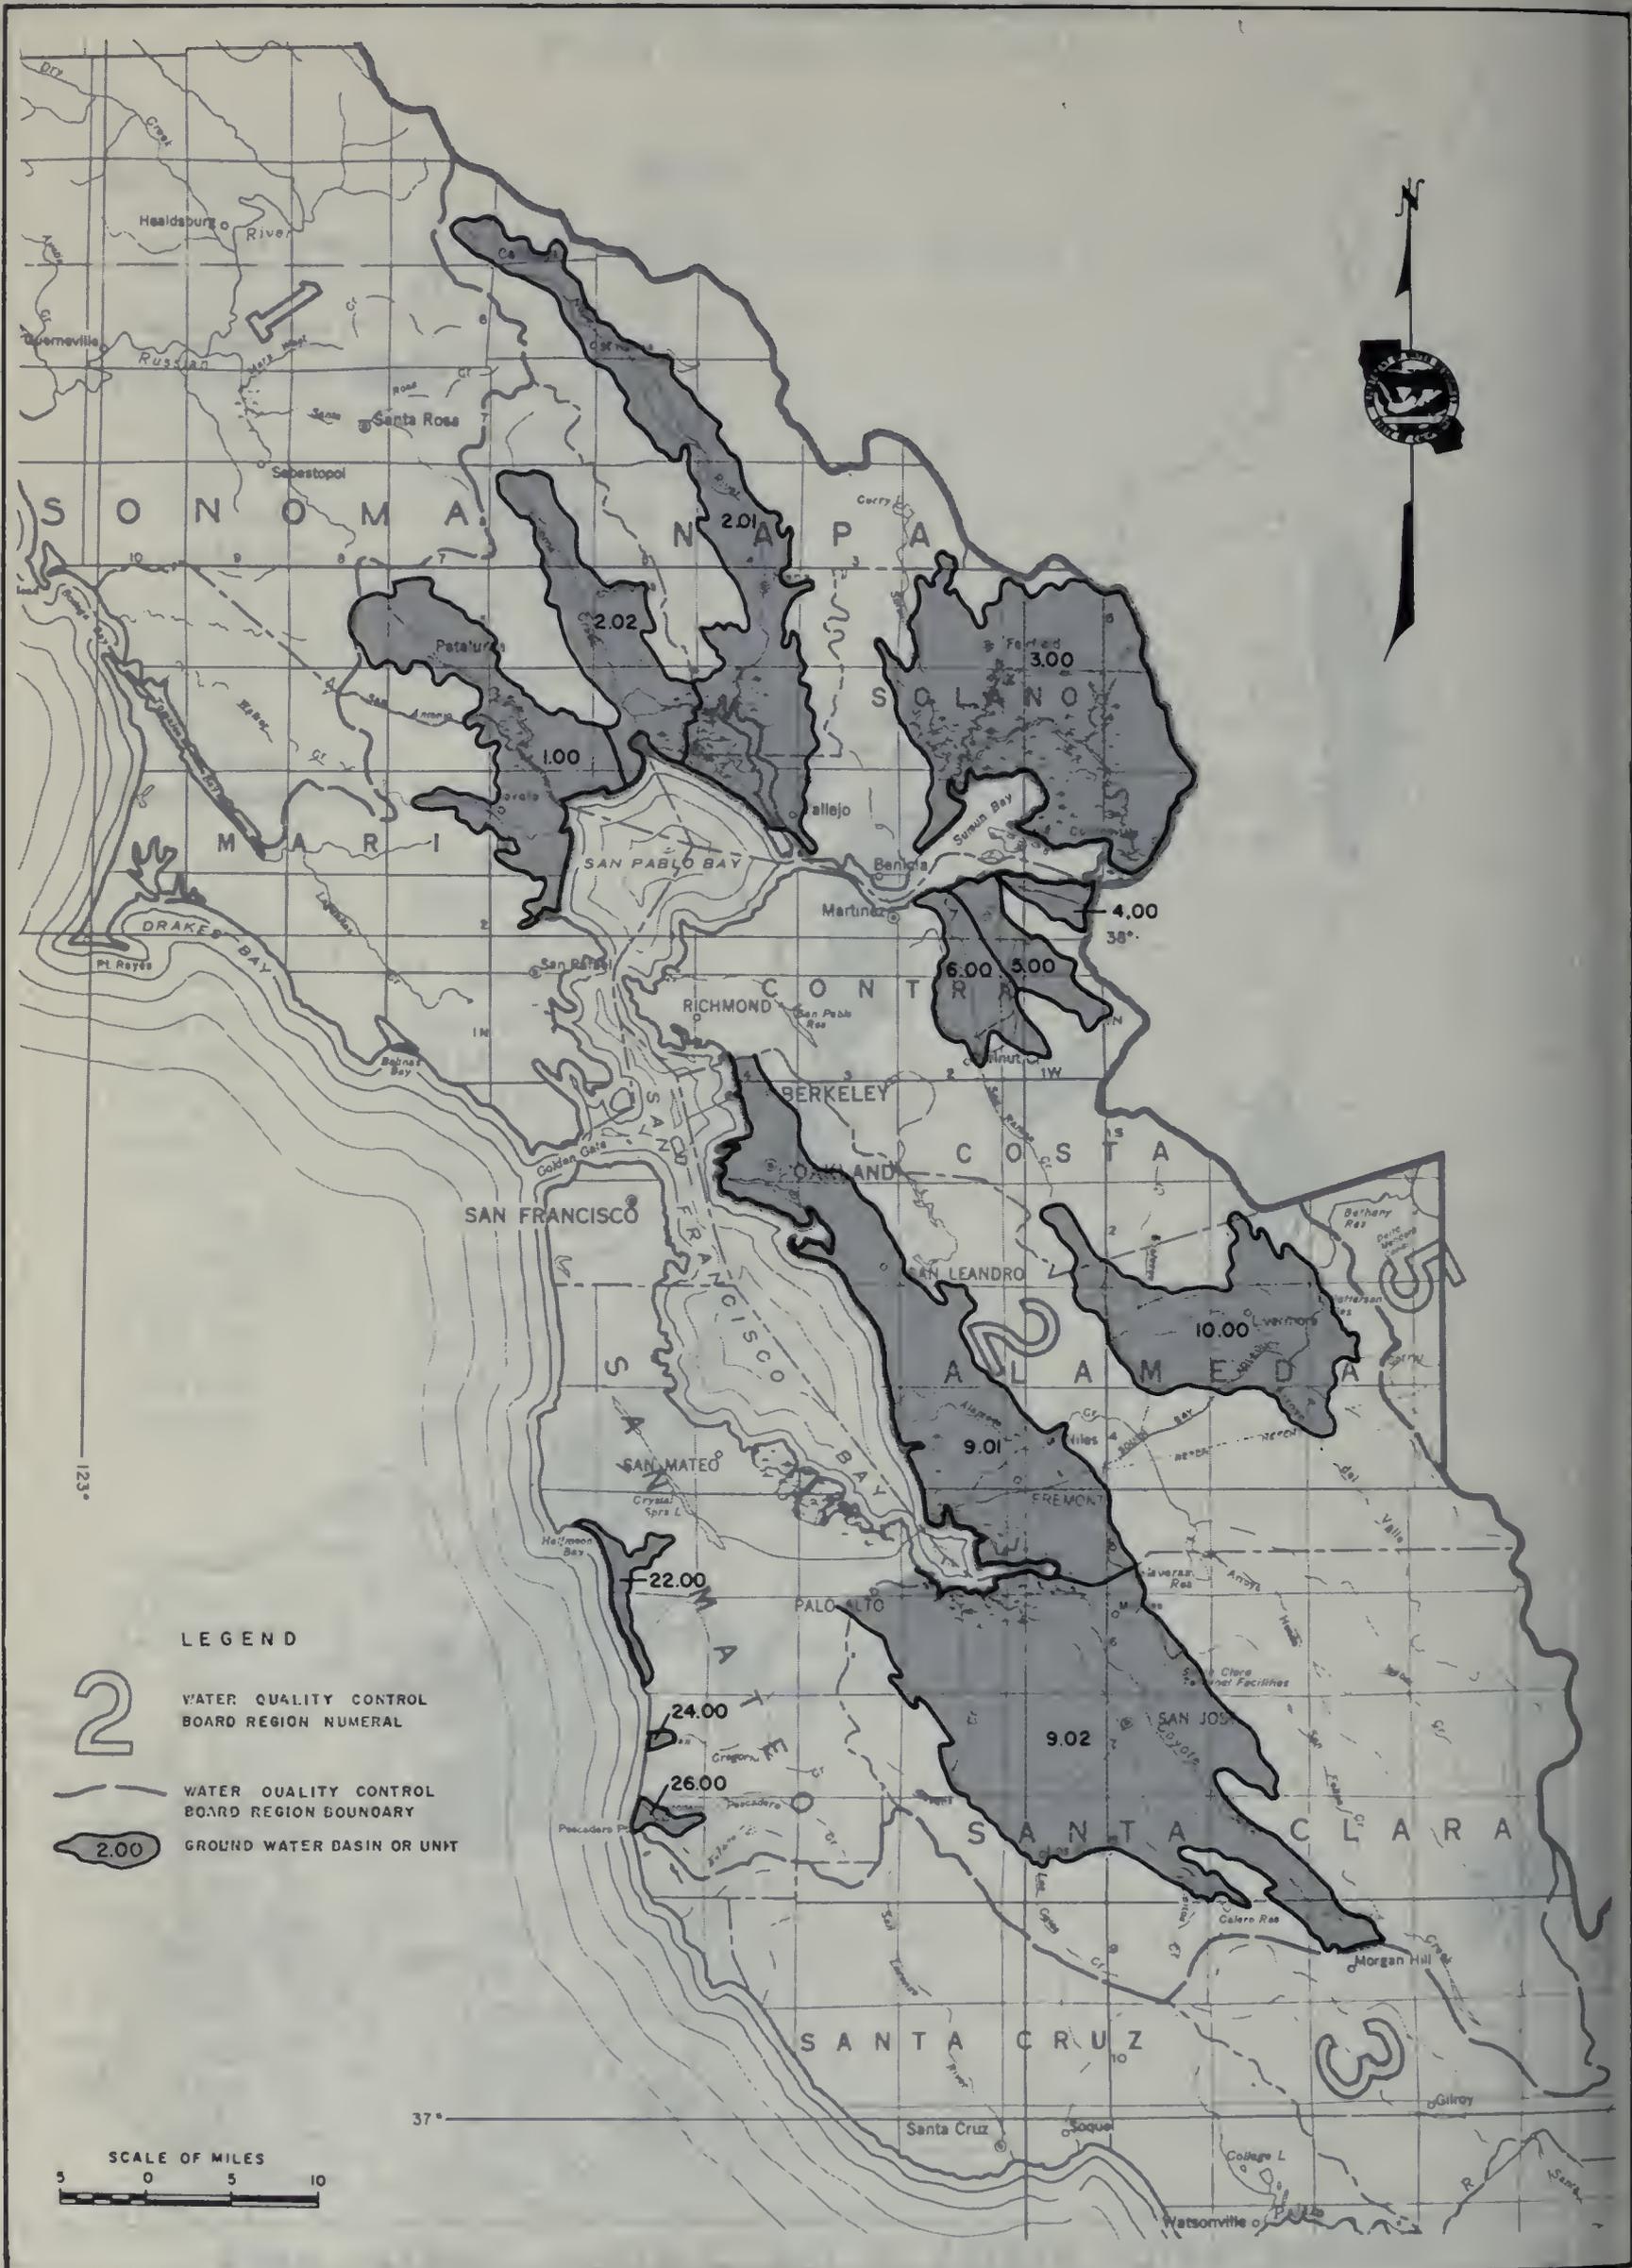

This number identifies and locates the well. In the example, the well is in Township 17 North, Range 11 West, Tract J of Section 18, located in the Mount Diablo Base and Meridian. A section is divided into 40-acre tracts as shown above on the right. Sequence numbers in a tract are generally assigned in chronological order. The example designates the fourth well to be assigned a number in Tract J.

## Appendix D

### SURFACE WATER QUALITY DATA

This appendix contains surface water quality data collected at stream and estuarine stations in the Central Coastal Area during the period from October 1, 1972, through September 30, 1973. Samples were collected by the Department of Water Resources, U. S. Bureau of Reclamation, U. S. Geological Survey, and Santa Cruz County Health Department.

The Department of Water Resources Laboratory used procedures from the latest edition of "Standard Methods for the Examination of Water and Wastewater" for the determination of mineral, nutrient, and biological constituents. Pesticides are determined in accordance with the "Guide to the Analysis of Pesticide Residues", U. S. Department of Health, Education and Welfare, 1965. Laboratory services for the U. S. Bureau of Reclamation are provided by the U. S. Air Force at McClellan Air Force Base. It uses procedures in accordance with the "FWPCA Methods for Chemical Analysis of Water and Wastes", November 1968, for all parameters.

Two numbering systems are used in this bulletin for identifying water quality stations. The first is for those stations for which the flow of water can be measured readily, as in streams and rivers. This system is described in Bulletin No. 157, "Index to Stream Gaging Stations In and Adjacent to California, 1970", Department of Water Resources.

The second numbering system is used for stations located in broad water bodies. This system is described as follows: The first two digits show the hydrographic unit as identified in the introduction to Appendix A. The third digit identifies the type of water body and, for this publication, is a "B" for Bay system; "L" for lake; "O" for Pacific Ocean; "R" for reservoir; and "S" for slough. The next digit is the last digit of the latitude in degrees, "3" for 33°, or "9" for 29°. The last three digits are the minutes of latitude to the tenth of a minute. The last four digits are the longitude in the same manner as latitude. A fifth digit indicates a sequence number when two stations have the same 8-digit latitude and longitude numbers.

Example: E0 B 802.3 207.1 2

E0	San Francisco Bay
B	Water Body -- Bay
8	38° Latitude
02.3	02.3' Latitude
2	122° Longitude
07.1	07.1' Longitude
2	Second Station

TABLE D-2

MINERAL ANALYSES OF SURFACE WATER

Sampler and Lab Agency Codes

- 5001 - U. S. Bureau of Reclamation
- 5050 - Department of Water Resources
- 5063 - Santa Cruz County Health Department

Abbreviations

- TIME - Pacific Standard Time on a 24-hour clock
  - G.H. - Instantaneous gage height in feet above an established datum
  - Q - Instantaneous discharge in cubic feet per second
  - DEPTH - Depth in feet at which sample was collected
  - DO - Dissolved oxygen content in milligrams per liter
  - SAT - Percent of normal dissolved oxygen saturation
  - TEMP - Water temperature at time of sampling in degrees Fahrenheit (F) and Celsius (C)
  - PH - Measure of acidity (<7) or alkalinity (>7) of water
  - EC - Electrical conductance in micromhos at 25°C
  - TDS - Gravimetric determination of total dissolved solids at 180°C
  - SUM - Total dissolved solids by summation of analyzed constituents
  - TH - Total hardness
  - NCH - Noncarbonate hardness - any excess of total hardness over total alkalinity
  - TURB - Jackson Turbidity Units measured with a Hellige Turbidimeter (E) or a Hack Nephelometer (A)
  - SAR - Sodium adsorption ratio
- PERCENT REACTANCE VALUE is determined by dividing the sum of the cations or anions in milliequivalents per liter into each constituent in milliequivalents per liter, arriving at a percentage. For a partial analysis, an approximate value is determined by multiplying the electrical conductance by 0.01 and using that as the cation or anion sum.

Mineral Constituents

- |      |   |             |      |   |           |
|------|---|-------------|------|---|-----------|

TABLE D-3

MINOR ELEMENT ANALYSIS OF SURFACE WATER

Sampler and Lab Agency Codes

- 5001 - U. S. Bureau of Reclamation
- 5006 - McClellan Air Force Base Laboratory
- 5050 - Department of Water Resources

Abbreviations

- TIME - Pacific Standard Time on a 24-hour clock
- DISCH - Instantaneous discharge in cubic feet per second
- EC - Electrical conductance in micromhos at 25° Celsius
- TEMP - Water temperature at time of sampling in degrees Fahrenheit (F) and Celsius (C)
- PH - Measure of acidity (<7) or alkalinity (>7) of water
- CHROM (ALL) - All chromium
- CHROM (HEX) - Hexavalent chromium
- D - Dissolved
- T - Total

TABLE D-4

MISCELLANEOUS CONSTITUENTS IN SURFACE WATER

Sampler and Lab Agency Codes

- 5001 - U. S. Bureau of Reclamation
- 5050 - Department of Water Resources
- 5063 - Santa Cruz County Health Department

Abbreviations and Constituents

- TIME - Pacific Standard Time on a 24-hour clock
- TEMP - Water temperature at time of sampling in degrees Fahrenheit (F) or Celsius (C)
- EC - Electrical conductance in micromhos at 25° Celsius
- DO - Dissolved oxygen content in milligrams per liter
- G.H. - Instantaneous gage height in feet above an established datum
- PH - Measure of acidity (<7) or alkalinity (>7) of water: F - Field; L - Lab
- DISCH - Instantaneous discharge in cubic feet per second
- MBAS - Methylene blue active substance (a test for detergent surfactants) in milligrams per liter: L - Linear alkylate sulfonate; A - Alkyl benzene sulfonate
- DEPTH - Depth in feet at which sample was collected
- TURB - Jackson Turbidity Units
- T+L - Tannin and lignin as tannic acid in milligrams per liter
- CHLOR - Field determination of residual chlorine in milligrams per liter
- O+G - Oil and grease in milligrams per liter
- COLOR - True color in color units
- SET S - Settleable solids in milliliters per liter (ML/L) and milligrams per liter (MG/L): F - Field; L - Lab
- BOD - Biochemical oxygen demand in milligrams per liter: A - 4 days; B - 5 days; C - 6 days; D - 7 days; E - 100 days; F - other
- SUS S - Suspended solids in milligrams per liter: 5 - at 105°C; 8 - at 108°C
- COD - Chemical oxygen demand in milligrams per liter
- V SUS S - Volatile suspended solids in milligrams per liter
- CYANIDE - Cyanide in milligrams per liter
- PHENOLS - Phenols in milligrams per liter
- TOC - Total organic carbon in milligrams per liter
- DOC - Dissolved organic carbon in milligrams per liter
- IODIDE - Iodide in milligrams per liter
- T ODOR - Threshold odor number at 60°C
- BROMIDE - Bromide in milligrams per liter
- SULFITE - Sulfite in milligrams per liter
- T SULF - Total sulfides in milligrams per liter
- D SULF - Dissolved sulfides in milligrams per liter
- CC EXT - Carbon chloroform extract
- CA EXT - Carbon alcohol extract

TABLE D-5

NUTRIENT ANALYSIS OF SURFACE WATER

Sampler and Lab Agency Codes

- 5001 - U. S. Bureau of Reclamation
- 5050 - Department of Water Resources
- 5063 - Santa Cruz County Health Department

Abbreviations and Constituents

- TIME - Pacific Standard Time on a 24-hour clock
- G.H. - Instantaneous gage height in feet above an established datum
- DISCH. - Instantaneous discharge in cubic feet per second
- TEMP - Water temperature at time of sampling in degrees Fahrenheit (F) and Celsius (C)
- DEPTH - Depth in feet at which sample was collected
- PH - Measure of acidity (<7) or alkalinity (>7) of water
- EC - Electrical conductance in micromhos at 25° C
- TURB - Jackson Turbidity Units measured with a Hellige Turbidimeter (E) or a Hack Nephelometer (A)
- F-CO2 - Field determination of carbon dioxide in milligrams per liter
- CACO3 P - Field Alkalinity (Phenol)
- CACO3 T - Field Alkalinity (Total)
- HCO3 - Bicarbonate in milligrams per liter
- CO3 - Carbonate in milligrams per liter
- NH3 - Unfiltered ammonia
- NO2 - Unfiltered nitrite
- NO3 - Unfiltered nitrate
- F ORG N - Dissolved organic nitrogen
- U ORG N - Organic nitrogen
- F (NH3 + - Ammonia and dissolved organic nitrogen
- U ORN N) - Ammonia and organic nitrogen
- DIS - Dissolved acid hydrolyzable phosphate
- A.H.PO4
- F H3PO4 - Dissolved orthophosphate
- U H3PO4 - Total orthophosphate
- F TOT P - Dissolved total phosphorus
- U TOT P - Total Phosphorus

TABLE D-6

PESTICIDES IN SURFACE WATER

Sampler and Lab Agency Codes

- 5001 - U. S. Bureau of Reclamation
- 5050 - Department of Water Resources

Abbreviations

- TIME - Pacific Standard Time on a 24-hour clock
- TEMP - Water temperature at time of sampling in degrees Fahrenheit (F) and Celsius (C)
- EC - Electrical conductance in micromhos at 25°C
- DO - Dissolved oxygen content in milligrams per liter
- PH - Measure of acidity (<7) or alkalinity (>7) of water
- DEPTH - Depth in feet at which sample was collected
- DISCHARGE - Instantaneous discharge in cubic feet per second

Pesticides

Chlorinated Hydrocarbons

- | <u>Code</u> | <u>Most Common Name</u>  |
|-------------|--|
| CAPTAN      | - CAPTAN   |
| DACTHAL     | - DACTHAL  |
| DDT         | - DDT (Code includes all Isomers; Para Para etc.)                        |
| DIELDRIN    | - DIELDRIN   |
| UNKNOWN     | - Complex chlorinated compound mixture as (Reported as DDT), one or more |
| NONE        |  |
| DETECTED    | - No detectable amount of Chlorinated Hydrocarbons                       |

Organic Phosphorus

- ORGANIC P - Organic Phosphorus compounds as Parathion
- UNKNOWN - Complex mixture as Parathion (Reported as Parathion), one or more
- NONE
- DETECTED - No detectable amount of organic phosphorus.

## APPENDIX E

### GROUND WATER QUALITY DATA

This appendix presents ground water quality data collected during the period from October 1, 1972, through September 30, 1973. The data were collected from a number of major ground water sources in the Central Coastal Area in cooperation with other state, local, and federal agencies. During the 1973 water year, 226 wells were sampled in 34 ground water basins and subbasins or subareas.

At the time of field sampling, pH and temperature measurements are normally made. Comments on current conditions are noted in field books which are available in the files of the Department of Water Resources.

Laboratory analyses of ground waters were performed in accordance with "Standard Methods for the Examination of Water and Wastewater", 13th Edition.

The Region and Basin and State Well Numbering Systems are described in Appendix C, "Ground Water Measurements", on page 19. The locations of the ground water basins and subbasins are shown on Figure C-1, pages 21, 22, and 23.

TABLE E-1

MINERAL ANALYSES OF GROUND WATER

Sampler and Lab Agency Codes

- 2400 - Santa Clara Valley Water District
- 5000 - U. S. Geological Survey
- 5050 - Department of Water Resources
- 5100 - Alameda County Flood Control and Water Conservation District
- 5114 - Santa Clara County
- 5115 - Monterey County Flood Control and Water Conservation District
- 5401 - Alameda County Water District

Abbreviations

- TIME - Pacific Standard Time on a 24-hour clock
- TEMP - Water temperature in degrees Fahrenheit (F) and Celsius (C) at the time of field sampling
- PH - Measure of acidity (<7) or alkalinity (>7) of water
- EC - Electrical conductance in micromhos at 25° C
- TDS - Gravimetric determination of total dissolved solids at 180° C
- SUM - Total dissolved solids by summation of analyzed constituents
- TH - Total hardness
- NCH - Noncarbonate hardness - any excess of total hardness over total alkalinity
- SAR - Sodium adsorption ratio

Mineral Constituents

- |      |   |             |      |   |           |
|------|---|-------------|------|---|-----------|
| B    | - | Boron       | K    | - | Potassium |
| CA   | - | Calcium     | MG   | - | Magnesium |
| CL   | - | Chloride    | NA   | - | Sodium    |
| CO3  | - | Carbonate   | NO3  | - | Nitrate   |
| F    | - | Fluoride    | SI02 | - | Silica    |
| HCO3 | - | Bicarbonate | S04  | - | Sulfate   |

## Appendix F

### WASTE WATER DATA

Appendix F, "Waste Water Data", which appeared in certain volumes of Bulletin No. 130 series, has been discontinued. For information regarding waste water, the reader is referred to the recently reactivated Bulletin No. 68 series: "Inventory of Waste Water Production and Waste Water Reclamation Practices in California".

Please note the data presented in Bulletin No. 68 are on a calendar year basis rather than a water year basis as is the case in Bulletin No. 130.
